

Ref: Pollite

8th December 2010

To whom it may concern,

We recently installed Pollite's frangible Approach masts on both approaches at Glasgow International Airport on behalf of our client, BAA (British Airport Authority). We have found the product to be of high quality, easy to install and assemble. We found the Pollite service to be both attentive and helpful during the installation process and we have been very satisfied with Pollite's overall contribution to this significant project.

Yours sincerely,
For and on Behalf of Inviron Limited

Neil Smith

Project Manager
